

# Time Card Management

## EASY TO USE

**eSUB's Time Card Management** Software allows a seamless transfer of data from all your job sites, directly into your accounting software for all payroll and job costing. With customized role based permission levels built in, time and other costs can be entered from the field, tracking individuals or entire crews. Track just one project or multiple projects simultaneously. Once data is entered it can be locked down for editing or approval by senior staff before being imported to accounting for accurate job costing and forecasting.

## SECURE ONLINE PORTAL

Once time cards have been entered through your secure company portal, your company's back office accounting staff can log in to the same portal to review, edit, approve and upload time cards directly into your accounting software.

## NO MORE ERRORS

Thanks to eSUB's Time Card Management Software you can enter time card data from any location, eliminating double entry. Employees can simply enter individual or batch time cards across a single or multiple projects, with a few clicks.
