

eSUB INTEGRATION SOLUTIONS

eSUB cloud-based construction software integrates seamlessly with all types of estimating and accounting software, creating a “Best of Breed” platform for managing your entire business. eSUB’s solution is designed to build your bottom-line profits by empowering you to get more done with less. Our professional software integration team are experts in ensuring the software - estimating, project management, and accounting, are designed exclusively for subcontractors to enhance their productivity and grow profits.

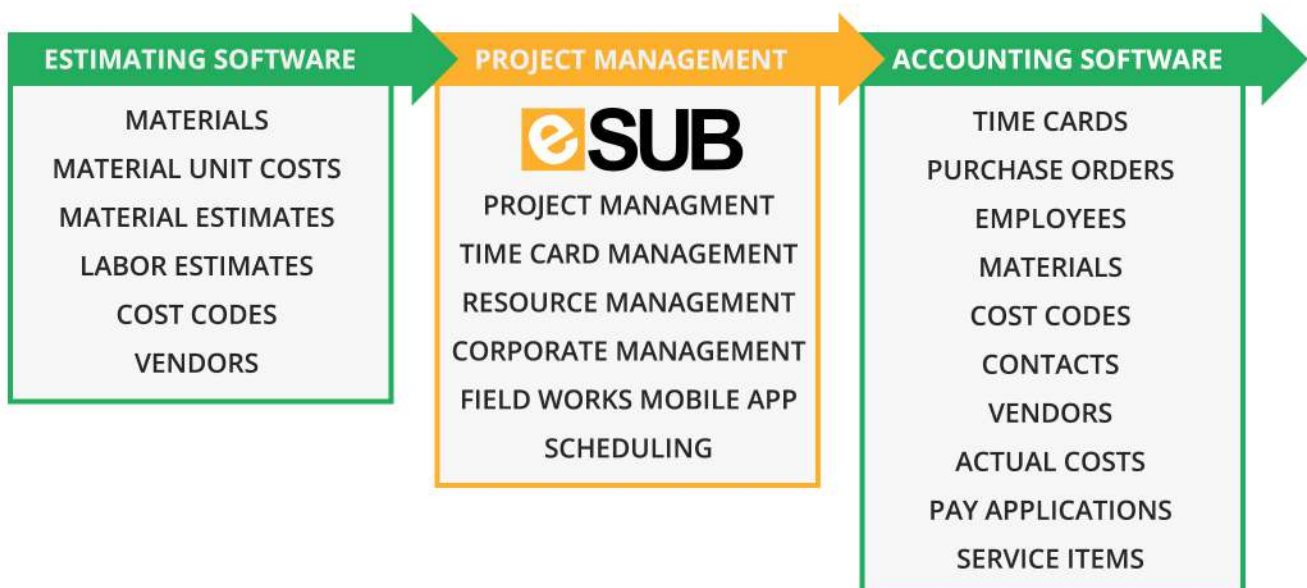

**CLOUD-BASED
TECHNOLOGY**

CLIENT BENEFITS

- Automatically push and pull data between eSUB and your estimating and accounting software products.
- Avoid erroneous data submissions by eliminating double entry.
- Always keep financial and project data secure.
- View up-to-date job costs vs. estimates and project details as they are being recorded in real-time.
- Increase communication between staff - estimators, project managers, accounting and executives to increase efficiencies and profit margins.

“BEST OF BREED” INTEGRATED PLATFORM

eSUB ESTIMATING SOFTWARE INTEGRATION

eSUB integrates with any estimating software and enables users to pass materials, cost codes, contracts, vendor information, project info and bid amounts without eliminating duplicate data entry and errors, increasing accuracy and profit margins.

eSUB ACCOUNTING SOFTWARE INTEGRATION

eSUB construction software integrates with all types of accounting software. eSUB can push time cards, purchase orders, change orders, and pay applications directly into your accounting platform. eSUB can then pull and populate employees, material costs, cost codes, contacts, and vendors. This integration greatly enhances communication between accounting and workers in the field.
